Recent Experience

Learning Fuze Web Development Bootcamp // June 2015 to September 2015

- Completed intensive 12 week full immersion web development bootcamp and coded for 12 hours a day which represents more than 900 hours of web development training.
- With a focus in the frontEnd, I conquered mountains of code polishing my ability to work with HTML, CSS, Javascript, jQuery, AJAX, PHP and MySQL.
- Participated in several group projects and hackathons, gaining real world experience in working with others in a development environment.
- Utilized git and github on all projects and assignments throughout the program, developing the skills necessary to manage every aspect of a version control system.
- Completed 7 different projects, each of which emphasized specific technical skills taught in the program.
- In the process of completing a final project which is an application that allows surfers to access raw weather data.

Freelance Web Development Work // June 2014 to Present

- Find, pitch and land clients.
- Bring Projects from Concept to completion in close coordination with clients.
- Asses scope of proposals and accurately estimate time needed to complete projects to the satisfaction of clients.
- Work in conjunction with the designer, to wire frame and create the basic outline for site.
- Develop sites either using a Wordpress or create a static site depending on client needs.
- Test sites on a variety of devices and in all major browsers to troubleshoot potential issues.

- Work collaboratively with client to make changes throughout the project as necessary.

Intern Developer with Made by Grizzly // February 2014 to September 2014

- Learned and implemented the best practices for developing dynamic websites.
- Created and modified Static Sites and pages with HTML5, CSS3 and Javascript.
- Created and modified Dynamic sites using Wordpress, HTML, CSS and PHP.
- Worked in conjunction with designers and other developers to develop and modify client sites.
- Worked with the CMS Magento, inputting product data for new Sticky Bumps website.

Administrator with Capitol Debate // February 2013 to May 2015

- Helped facilitate the administrative side of Summer Programs and online classes for hundreds of customers.
- My tasks varied season to season, but over the years I have been involved in a variety of areas:
 - Website Maintenance, vetting and hiring new faculty and staff, training of new faculty, customer service and helpdesk management, technical Support for online classes and program logistics for both summer programs and online classes.

Co-owner of Lulight photography // February 2013 to Present

- Worked in coordination with a partner to start and run a photography business.
- Implemented and modified a wordpress theme which met the needs of the business.
- Formulated and implemented different marketing campaigns through social media.
